Although reliability is highly variable and dependent on the owner of the vehicle, the Subaru Forester is recognized for its high standards and excellent safety features. We have compiled a list of the various Subaru Forester models, and the reviews, issues, customer complaints, and repair costs associated with each model. This list should help you decide which model is the best fit for your individual needs and preferences. If you have not owned a Subaru Forester in the past, it is always a good idea to visit a Subaru dealership and test drive the vehicle before purchasing. Each model offers its own distinct advantages, but additional or special features does not necessarily mean that the model is more reliable. Make sure to do your thorough research, visit a dealership, or visit a used car lot before making a final decision on which specific model is the best choice for your new vehicle. Short answer: you. The longer answer is a car's reliability and longevity are inextricably tied to how you take care of your vehicle, your maintenance schedule (if you have one), your conservative or brash driving habits, and whether or not you live in climates where extreme weather could affect the car's construction. Preemptive maintenance like regular oil changes, fluid flushes, tire rotation, and fuel system cleaners, along with keeping the exterior and underside of your car clean, will all increase the life expectancy of your car. Keeping it out of the harsh desert or tropical sun, as well as away from the rust-inducing salted roadways of winter, will also extend its life. And lastly, keeping the Mario Andretti driving antics to a minimum will keep your brakes, engine, tires, and chassis under-stressed and happy for far longer compared to hitting every trip to the grocery store like it's the Indy 500. Here's a quick rundown of various Foresters, including the common problems, customer complaints, and repair costs that will help you make the best decision when purchasing your next car. Average Repair Costs: \$1600, according to CarComplaints.com"My car was, in fact, one of the affected, I was told "no." As the years went by, I had to have the oil checked before any extended car trip. Even with that, the oil lamp was lighting up when I was on the AC Expressway or the NJ Turnpike near New York or 195 down south. I could never be certain that I wouldn't be stranded due to the oil problem. I even had the test done twice. It was the piston which eroded all the more as the years went by. I was in touch with Subaru at all levels of the organization. I was also a loyal Subaru customer- this being my 3rd or 4th Subaru. Well, sadly for Subaru, instead of my continued praises, it is getting my warning. The 2014 Forester is a disaster where oil is concerned. If you don't want to have to put oil in every 1500 - 2000 miles, I urge you to steer clear of this car." - 2014 modelAverage Repair Costs: \$1000, according to CarComplaints.com"Both rear suspension coil springs broke and need to be replaced and so do the struts. Both broke while driving on a well paved road going 35 mph. I did not hit or run over anything. They completely snapped apart. This is clearly due to defective part as there are 100's of complaints for this happening to 2014-2015 model Foresters and coming from a family of mechanics, this does not just happen. The car has 50K miles and is only driven on well paved roads. Springs broke while driving kids in back. Car very unstable and cannot stop as quickly. Really unsafe. These need to be recalled. I filed a complaint with NHTSA. Subaru needs to recall these. I have been in touch with Subaru customer service but no luck" - 2014 modelAccording to ID Power, this score "Measures the level of defects, malfunctions and design flaws experienced by vehicle from engine to infotainment system. A higher rating means fewer problems," If you're looking for a new Subaru Forester, or new to you Subaru Forester, look no further than Carvana.
